

It Was 107 Degrees in L.A. And NO ONE Could Get a Haircut

Why?

It was 107 degrees in Los Angeles on Sunday, September 6, 2020. And NO ONE could get a Haircut!

Why? Because everyone had a “fever” and the government medical authorities are TOO STUPID to make any exceptions.

Every physician knows that when the weather is hot, almost everyone’s temperature will rise. This is NORMAL! But the government makes no room for “common sense.” This is just another example of the HOAX of Covid-19. Any place where the government demands that a temperature be taken of the customers, no one can enter any establishment if the weather is hot.

Furthermore, the figure of 98.6 degrees as the “normal” temperature is just the center of a bell-shaped curve of many thousands of well people whose temperatures were taken when this was established many, many decades ago. This bell-shaped curve includes those whose NORMAL temperature is above 98.6 and those whose NORMAL temperature is below 98.6, in order to arrive at 98.6 as the CENTER of the bell-shaped curve.

That means, by the phony “standards” of government medical authorities, some people will NEVER have a “normal” temperature, and therefore will be forever excluded from ALL businesses where temperature-taking is Mandatory!
