

# **Let's Discuss the New Booga Booga!**

**Lorraine Day, M.D.**

- 1) Are vaccinated people “shedding” and is that dangerous to the unvaccinated?**
- 2) Are our enemies sending Microwave weapons into our house to Burn us in our home?**

**First:**

**Are vaccinated people “shedding” and is that dangerous to the unvaccinated?**

First of all, there is no way to know who has been vaccinated and who has not, except for your friends and family, so it's impossible to “stay away” from those who have been vaccinated.

In addition, Covid 19 doesn't even exist (it has never been isolated), and it's highly probably that viruses don't even exist. They are only minuscule pieces of DNA that have tried to protect themselves from toxic substances in a person's body by building a protein coat around themselves.

So, I don't worry about it at all. If you are living, eating, and handling stress God's way, you will be healthy, and will not be able to “catch” anything.

God PROMISES:

“If - If - If you follow My laws (and that includes all of God’s natural health laws that I discuss in detail in my materials), My commandments (ALL Ten of them) and My decrees (including forgiving everyone who has ever wronged you, and giving up anger and grudge-holding and anxiety and fear - giving it ALL to the Lord), I WILL keep you FREE from EVERY disease.” Deut 7:11-15

I was able to reverse my 4th stage metastatic breast cancer that was declared “terminal” - by following God’s Health Plan (as noted in the verse above), and I have been totally well for over 25 years, so I can assure you I am NOT worried about someone “shedding” something that probably doesn’t even exist!

## **Second:**

### **Are our enemies sending Microwave weapons into our house to Burn us in our home?**

There is a recent article that claims our enemies are sending microwave weapons into private homes and burning people with them. Then a number of pictures are included, claiming to be the burns and injuries that have been caused by these supposed weapons.

But as a doctor, I can tell you these are FAKE! The “injuries” that are shown are routine medical problems: 1) venous stasis dermatitis of the lower legs, usually caused by the swelling secondary to congestive heart failure, 2) diabetic ulcers on the feet, 3) a woman’s face that is very red that can be caused by any drug reaction (including a reaction to a vaccine) or some other type of dermatitis.

And certainly, if they were going to “target” people in their homes, they would first target the dissenters who are speaking out against the “vaccines” – not just random people.

These are just more “scare tactics” by the Jewish Illuminati/New World Order crowd, who are shameless in their propaganda!
